

# CTL330 COIN SORTER

Secure added value

## CLASSIC COIN SORTING

The CTL330 is a rail sorter that sorts coins by diameter. It has a large inspection tray to allow the coins to be cleaned of all dirt and debris before they enter the hopper. Output is to a single drawer or optionally to cloth bags.

The CTL330 now utilises the new technology COINSURE ADAPTIVE coin sensor. COINSURE ADAPTIVE has improved inductors with finer tuned coils for the best differentiation between metallic alloys. Improved coin recognition is the result, ensuring that the CTL330 can easily out sort all foreign or counterfeit coins.

Professional coin detection from  
Currency Tech

Feature	Specification
<b>Detection:</b> Sensor Diameter Thickness Coin denominations	CoinSure Adaptive 14mm – 34mm <4mm 8
<b>General data:</b> Display type Batching Alarm system	LCD 2 complete settings Full drawer, self-check, jam
<b>Capacity and Speed:</b> Hopper capacity Counting speed	3000 pcs (Max) 600 pcs/min. (Max)
<b>Technical data:</b> Dimensions Weight Power consumption Power supply	600 x 300 x 420 mm (W x L x H) 30 Kg. 80W 110V/50Hz – 220V/60Hz
