

"LAUREL" IS THE RIGHT CHOICE FOR YOUR COIN WRAPPING MACHINE. Heavy Duty Coin Wrapper

Automatic Jam Reconciliation & Rejection

Its unique mechanism clears the jam speedily and automatically and the Machine continues without interruption. Full coin sensors enables foreign coin, smaller/larger diameter coin, odd coin to be rejected. Irregular coin stacks are automatically rejected into the Clear Box/Sort Box with the number of coin rejected automatically deducted and shown on the count display

Graphic LCD Display

The User-friendly panel gives an easy-to-see and fool-proof, clear visual operational guidance. All counting and wrapping procedures are illustrated and instructed to the operator on the display.

Multi-coin Processing Capabilities (self-teach mode)

The stacker motors and memory card make it simple to change coin wrapping specifications for whenever a new coin enters circulation or if other non-standard coins need to be temporarily handled.

A unique 'Maintenance Mode' will help greatly reduce the delicate and time-consuming mechanical and electrical adjustments and also allows a self-teach mode for any coins
